Inhalation:

Remove from source of exposure to fresh air.

Skin Contact:

Thoroughly wash off skin with water.

Eye Contact:

Carefully flush eyes with large amounts of water. Remove contact lenses.

Ingestion:

If swallowed, thoroughly wash out mouth and drink plenty of water. Do not induce vomiting. Get medical attention if necessary.

SECTION 5: FIRE-FIGHTING MEASURES

Suitable Extinguishing Media:

Water spray.

Specific Hazards During Fire Fighting:

No further relevant information available.

Special Protective Equipment for Fire Fighters:

No special measures required.

Further Information:

Caution, burning may continue inside bags or piles after surface fire is out. Break bags or separate pile to ensure that fire is extinguished. The thermal decomposition products are those commonly observed with natural products such as wood or other vegetative matter.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Personal Precautions:

No special measures required.

Protective Equipment:

Not normally necessary. If excessive dust is created use of an approved respirator or local exhaust is advised. Protective eyewear should be worn where dust levels are high enough to cause irritation.

Environmental Precautions:

Avoid discharge into lakes, streams or ponds.

Methods of Containment and Cleanup

Use methods to clean spill which avoid creating airborne dust.

SECTION 7: HANDLING AND STORAGE

Precautions for Safe Handling:

Inhalation of dust may irritate nose, throat, lungs and eyes. Avoid creating airborne dust. Avoid exposure to open wounds. Wear personal protective equipment and clothing as necessary.

Conditions for Safe Storage, Including Incompatibilities:

Store at ambient temperature in a dry location. Keep away from open flame, sparks and heat sources. Keep away from children and pets.

Further Information:

Use good personal hygiene practices. These materials are made from natural products and may contain naturally occurring and/or inoculated microorganisms. Proper precautions are advised to prevent infection of open wounds, inhalation of excessive amounts of dust, and eye irritation. The proper hygiene practices necessary to prevent health hazards from any naturally occurring substance such as soil, bark, etc. should be observed.

SECTION 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

Components with Occupational Exposure Limits (lists that were valid at creation used as basis):

Component	CAS Number	Type	Value
Nuisance dust	n/a	OSHA PEL	Respirable: 5mg/m ³ ; Total: 15mg/m ³
		ACGIH TLV	Respirable: 5mg/m ³ ; Total: 10mg/m ³

Personal Protective Equipment (PPE)

Engineering Measures:

Local exhaust advisable if excessive dust is created.

Eye Protection:

Protective eyewear should be worn where dust levels are high enough to cause irritation.

Hand Protection:

Not normally necessary but suggested in cases of open wounds that are not adequately protected.

Skin and Body Protection:

Normal work clothing.

Respiratory Protection:

If dust is created use a respirator approved for nuisance dust of this type.

General Protective and Hygienic Practices:

Appropriate respirator, eye protection and ventilation under conditions where excessive dust is created. Open wounds should be kept clean and protected. Use good personal hygiene practices. After handling material wash hands before eating, drinking, smoking, or using toilet facilities. Keep away from foodstuffs and beverages.
