

SOIL Feeding Schedule

Use your preferred FoxFarm potting soil when transplanting seedlings into larger containers. We recommend an eight litre size or larger. **FOR BEST RESULTS:** Feed up to two times per week. Maintain a pH of 5.6 to 6.8 to prevent nutrient lockout and reduce stress on plants. Never mix

pure concentrates together; always add water first. Should plants show signs of stress or color irregularities, flush your system. When using coco-based media, flush every 2 weeks during the flowering cycle as coco has a tendency to retain unwanted salt residue more than peat-based soils.

MILLILITRES/GRAMS PER LITRE OF WATER

FEED UP TO TWO TIMES PER WEEK

Time*	Week	Seedlings and Cuttings	1	2	3	4	5	6	7	8	9	10	11	12
