

GRINGO RASTA™

SOIL Feeding Schedule

Use your preferred FoxFarm potting soil when transplanting seedlings into larger containers. We recommend an eight litre size or larger. **FOR BEST RESULTS:** Feed two times per week. Maintain a pH of 5.6 to 6.8 to prevent nutrient lock up and reduce stress on plants. Never mix

pure concentrates together; always add water first. Should plants show signs of stress or color irregularities, flush your system. When using coco-based mediums, flush three times during the growing season as coco has a tendency to retain unwanted salt residue more than peat-based soils.
